Inspired by the fluidity and formlessness of water droplets, the Splitty family boasts a wide range of flexible task lights. The original Splitty Desk Lamp delivers maximum functionality. Splitty Reach features a double arm, offering even more flexibility. Splitty Floor Lamp extends flexibility and modernity beyond the desk. There are multiple mounting options for the desk lamps, including wall mounts, desk clamps and wireless charging bases. All versions of Splitty feature USB ports for charging devices, and Splitty Pro and Splitty Reach Pro each feature a 2 amp USB port and built-in occupancy sensor to maximize energy efficiency.

Interior Design Best of Year Honoree 2017

Splitty desk lamp is the flagship product in the Splitty line. Splitty desk lamp features fluid motion and ultra flexibility. It can be posed in a multitude of ways, making the 17" high lamp one of the most flexible lights on the market. The curved, droplet-shaped LED head reflects the root of its inspiration. The unusual split arm design acts as a power transmitter and creates a smooth, minimalist silhouette.

Splitty's unique joint design allows for incredible articulation. Bend the lamp's body forward and back and rotate around the base. Bend the LED head forward and back and rotate 360°

Splitty is available in seven finishes. Introduce a quirky pop of color into your space or choose a classic finish such as matte black or silver.

Discreetly embedded in the joint is a convenient USB port to charge your phone or tablet.

## 9 Hour Shutoff

To further build upon energy efficiency, Koncept designers installed an auto shut-off mechanism into the Splitty. After 9 hours of being powered on, the lamp will power itself off. This coincides with working hours, so is especially effective in a commercial setting with multiple lamps.

## Splitty Pro

The "pro" version of Splitty features a 2A USB port for rapid charging. It also features an occupancy sensor that powers the lamp off after 15 minutes of no activity in the immediate area. This sensor maximizes the already-high energy efficiency.

# Mounting Options

The standard Splitty Desk Lamp was designed to encompass a minimal footprint. Koncept designers amplified this idea by ensuring the lamp is compatible with a variety of Koncept's mounting options. When users incorporate desk clamps, grommet mounts and hardwire wall mounts, they automatically create more desk space. The lamp's power cord is barely visible with these mounts. The Qi base provides quick and easy charging for compatible phones. Users can simply place their phone on the base, and the device will automatically begin charging.

# Splitty reach desk lamp

Splitty Reach Desk Lamp is the double armed version of the renowned Splitty. The product profile of the original Splitty (single bar) design was kept small and minimal, with the main idea being to allow it fit into cubicles and work stations without taking up too much space. Splitty Reach was designed based on a similar logic. With its small size, it fits into the tightest table space while its double arm design allows it to extend outwards. This is especially appropriate when it has to illuminate the desk from behind objects like a computer monitor.

## Functionality & Applicability

The quirky yet functional design is appropriate for current workplaces, as users style their environments with more intention than ever before. Since the lamp features a large light source relative to similar desk lamps on the market, those with poor overhead lighting can enjoy a wide imprint of light. This generously sized LED head is diffused, so that harsh/multiple shadows—an issue commonly seen with low quality LED lamps—are avoided. Instead, the user enjoys even light with very soft shadows.

The base joint is a spring assisted joint, with the internal spring hidden from view and overall appearance kept minimalist. The spring assistance helps to achieve a fluid movement with minimal effort needed from the user when adjusting the lamp. Attention to subtle details such as the fluidity in movement and curved light source are what make this lamp stand out.

## 9 Hour Shutoff

To further build upon energy efficiency, Koncept designers installed an auto shut-off mechanism into the Splitty. After 9 hours of being powered on, the lamp will power itself off. This coincides with working hours, so is especially effective in a commercial setting with multiple lamps.

## Splitty Reach Pro

The "pro" version of Splitty Reach features a 2A USB port for rapid charging. It also features an occupancy sensor that powers the lamp off after 15 minutes of no activity in the immediate area. This sensor maximizes the already-high energy efficiency.

# Mounting Options

The standard Splitty Reach was designed to encompass a minimal footprint. Konzept designers took this idea to another level by ensuring the lamp is compatible with a variety of Konzept's mounting options. Lamps mounted to the edge of the desk, a wall or directly into the desk can contribute to a very clean work surface. The lamp's power cord is barely visible with any of these mounts. The Qi base provides quick and easy charging for compatible phones. Users can simply place their phone on the base, and the device will automatically begin charging.

# Splitty floor lamp

Splitty Floor Lamp delivers maximum functionality with a contemporary profile. The shape of the LED head reflects the root of its inspiration: water droplets. The fluidity of water is also referenced in the smooth and fluid motion of its movement. A USB port is located in the lower body for as a charging option for phones, tablets, et cetera.

Splitty Floor Lamp's upper body utilizes the same special joint mechanism found in the Splitty Desk Lamps. This joint allows the upper body to bend forward and back, providing ample flexibility. The LED head can similarly bend forward and back and also rotate 360°. A gentle nudge will rotate the entire lamp around the base.

Splitty is available in seven finishes, allowing users to introduce a pop of color into their space, or have the lamp blend into its surroundings.

Splitty Floor Lamp's diffused and dimmable light can be enjoyed for tasks such as reading or simply for ambience. Turn the LED head towards a wall to cast a soft, warm glow.
